ADMISSIONS & INSURANCE

Admissions at Bayside

Exceptional customer service starts the moment the client first calls. Whether they have tried to get help before or this is their first time reaching out, our dedicated admissions counselors will give them a free assessment and provide professional recommendations. By reviewing both clinical and financial needs, Bayside Marin can help determine the best path to healing that is right for them. If, for whatever reason, we determine that our program would not be the best fit, we will provide additional referrals and resources that better suit their needs. Our priority is to help them find recovery, even if it's not with us.

Admissions to Bayside Marin can typically be scheduled on very short notice. For our clients coming from out of state, we recommend flying into either the San Francisco or Oakland Airport. If they require transportation to our facility, Bayside staff would be happy to personally meet them at the airport for pickup.

Private Pay & Insurance

At Bayside Marin, we make every effort to keep our addiction and dual diagnosis treatment programs affordable while still ensuring the highest quality of care.

Clients have the option to pay privately or use insurance. They simply need to call with their insurance information and we'll provide a summary of coverage and a quote for treatment costs. Our expert staff will help the client to understand their plan benefits and simplify the process to aid in treatment planning.
